

expected that it will receive the cordial support of the newly-annexed population.

If the scheme is carried out, it can be carried out in a short while if it receives the cordial support of all interested parties. It will make Monument Avenue the most extensive and the most magnificent thoroughfare in this city or in any city of the South.

REAL ESTATE AND BUILDING NEWS

(Continued from First Page.)

be strictly fireproof and will be an ornament to that part of the city.

It is now expected that this splendid structure will be completed and ready for occupancy by the first of April.

Plans are being drawn for a first-class fireproof warehouse building, to be erected for the Allison estate on the south side of Canal Street, between Tenth and Eleventh streets. The warehouse, formerly occupied by the National Packing Company, is to be torn down to make room for this modern structure, the contract for the erection of which will be let as soon as the architect completes the plans.

Daily Court Record

Hustings Court.

February term of the court will be opened, grand jury will be sworn and charged at 11 o'clock; petit jury has been summoned for Tuesday at 11 A. M.

Circuit Court.

February term of court will open at 10 o'clock; jury will be called and docket gone over and cases set for the term.

Law and Equity Court.

Suits instituted yesterday: William Shelton vs. Maggie Shelton; prayer for divorce. W. H. Harris Grocery Company vs. E. F. Wyatt & Company, for \$10.70. Cases set for Monday: Mary Jones vs. News-Leader Company; damages claimed, \$1.00.

This is the last week of the present term, and promises to be a very busy week.

CHARTERS ISSUED.

Five New Concerns Are Authorized to Operate in Virginia.

The Corporation Commission yesterday issued the following charters:

Lowe, Petree, Johnston Company (Inc.), Norfolk. J. E. Lowe, president; H. H. Petree, vice-president; J. E. Petree, Norfolk. Capital: Maximum, \$100,000; minimum, \$25,000. Objects: Retail and wholesale grocery business.

Shelby Biscuit Company (Inc.), Richmond. B. M. Gwatney, vice-president; T. L. Stone, secretary; A. D. Williams, Richmond. Capital: Maximum, \$50,000; minimum, \$10,000. Objects: Manufacture and sale of biscuits, crackers, etc.

The Alaska Klondike Gold-Mining Exhibit Corporation, Norfolk. John Westhouse, president; C. M. Barry, J. Osborne, Norfolk. Capital: Maximum, \$25,000; minimum, \$5,000. Objects: Exposition exhibits.

Almond Realty Company (Inc.), Lynchburg. W. J. Almond, president; F. H. Almond, secretary and treasurer; F. H. Almond, vice-president; Lynchburg. Capital: Maximum, \$25,000; minimum, \$5,000. Objects: Real estate business.

Southern Hydraulic Construction Company (Inc.), Alexandria. H. L. Miller, president; Morganston, N. C.; H. A. Press, vice-president; Washington, D. C.; Frank W. Weller, secretary and treasurer; Washington, D. C.; J. B. Gordon, Capital: Maximum, \$15,000; minimum, \$5,000. Objects: Construction and contracting business in all its branches.

Council to Meet.

A very interesting program has been prepared for the meeting of the Virginia Section, Council of Jewish Women, to be held Tuesday afternoon, at 4 o'clock, in the vestry-room of Beth Abraham Temple.

Miss Mabel McBain will render several solos. Miss Minna Thalhimer will read a paper on Mendelssohn, and her lecture will be illustrated by piano selections by Mrs. Sigmar Hutzler. Miss Annie Louise Reinhardt will be present and will contribute several violin selections to the excellent program. Refreshments will be served. Members are requested to be prompt.

Charcoal Stops Gas On Your Stomach

Wonderful Absorbing Power of Charcoal When Taken in the Form of Stuart's Charcoal Lozenges.

Trial Package Sent Free.

Charcoal, pure, simple charcoal, absorbs 100 times its own volume of gas. Where does the gas go? It is just absorbed by the charcoal—it has no odor, and there is left a pure, fresh, sweet atmosphere, free from all impurities and germs.

That's what happens in your stomach when you take one or two of Stuart's Charcoal Lozenges, the most powerful purifiers science has yet discovered. You feel gas in company, sometimes by accident, gradually to your own humiliation. That is because there is a great amount of gas being formed in your stomach by fermenting food. Your stomach is not digesting your food properly. Gas is inevitable unless this happens, just take one or two of Stuart's Charcoal Lozenges right after eating, and you will be surprised how quickly they will act. No more belching, no more flatulencies. Eat all you want and when you want, and then if there is any gas left in the stomach, one of these wonderful little absorbers, a Stuart's Charcoal Lozenge, will take care of all the gas.

And it will do more than that. Every particle of impurity in your stomach and intestines is going to be carried away by the charcoal. No one seems to know why it does this, but it does and does it wonderfully. You notice the difference in your appetite, general good feeling, and in the purity of your blood, right away.

You'll have no bad breath either from drinking, eating or smoking. Other people will notice you have breath quicker than you will yourself. Make your food pure, fresh and sweet, so when you talk to others you won't disgust them. Just one or two Stuart's Charcoal Lozenges will make your breath sweet, and make you feel better all over for it. You can eat all the delicious and odorous foods you want, and no one can tell the difference.

Besides, Charcoal is the best laxative known. You can take a whole boxful and no harm will result. It is a wonderfully easy regulator.

And then, too, it filters your blood—every particle of poison or impurity in your blood is destroyed, and you begin to notice the difference in your face first thing—your clear complexion.

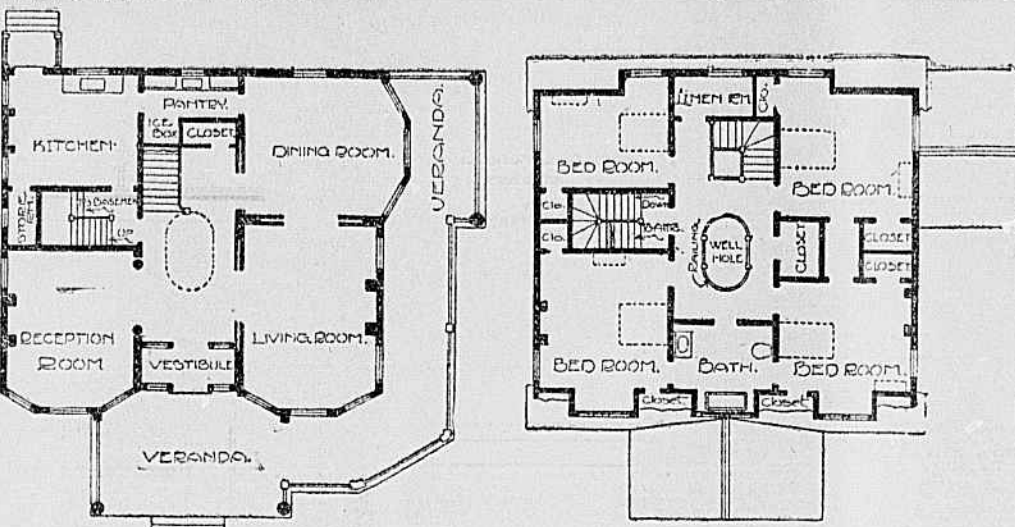

Stuart's Charcoal Lozenges are made from pure willow charcoal, and just a little honey is put in to make them palatable, but not too sweet.

They will work wonders in your stomach, and make you feel fine and strong. Your blood and breath will be purified. You want to know how to get them, so just send for a free sample to-day. After you get it and use it, you will like them so well that you will go to your drugstore and get a box of Stuart's Charcoal Lozenges.

Send us your name and address to-day, and we will at once send you by mail a sample package free. Address: F. A. Stuart Co., 54 Stuart Bldg., Marshall, Mich.

Plan For Attractive Country or Suburban Home.

Designed for The Times-Dispatch by C. K. Howell, Architect.

The house shown by the illustrations is to be erected upon a lot of ample size. The design is simple in form and treatment. The underpinning is planned to be of red brick laid in white mortar. The first story is to be of clapboard, painted a soft gray, while the second story is shingled and stained a dull greenish-gray color. The trimmings are white.

There is an attractive porch across the front and the side, and they are arranged as to permit the sunlight to enter each room, without precluding the possibility of having a roof over the porch.

The plan shows a central hall, entered through a vestibule which is broad and spacious; the hall is trimmed with cypress and brown. The hall contains an ornamental staircase. Opening from the hall there is the reception room, with an opening provided with columns, which support an archway. Opposite this archway there is a large brick fireplace.

To the right of the entrance is the large living-room, provided with the open fireplace, built of red brick, extending from the floor to the ceiling, with good effect. The dining-room, opening from the living-room and main hall, has a large pantry fitted

with cupboard, dresser, etc., and a recess for the ice-box. This pantry forms the entrance to the kitchen from the dining-room. The arrangements for service are well planned, with plenty of store-room and pantry space, and a rear stair for reaching the third floor or attic without passing through any part of the second floor.

The second floor is trimmed in pine and treated with white enamel, and contains four bedrooms and a bathroom. There is a linen closet and eight closets. The attractive feature of the second floor is the spacious hall, with a well hole with railing around same. The attic contains ample space for a servants' room and storage. The basement is provided with heating apparatus, fuel rooms, vegetable cellar, laundry, etc. Cost, \$4,000 complete.

SELECTING A BUILDING SITE.

There are but few persons who are in a position to locate their proposed home, which support an archway. Opposite this archway there is a large brick fireplace.

It is of the first importance that the location be a healthy one. Better rent all your life than ignore that. Avoid the neighborhood of swamps

and stagnant water, or where the cellar (if you have one) to your house from the nature of the location will be damp.

Large bodies of water, or running water are never unhealthy, but, on the contrary, in many ways conducive to health. Some very uninviting, rugged and neglected spots can, with but little expense and an appropriate building, be made exceedingly beautiful.

One of the prettiest schoolhouses I ever saw was built on a lot that looked as if the ground was worthless for any purpose. It was rocky, overgrown with briars and bushes, and a stream ran across the lot, alongside of which, on a level spot but little larger than room for a building, a house stood, and the adjacent hillside made a splendid study and playground for the scholars. When completed the building and grounds were a model of what a country schoolhouse should be. While an elevation is at all times desirable, a hill is not. The exposure to the storms in winter and the tire-some walk in summer is to be avoided. A few native trees, if on the ground to furnish shade, are desirable. The water-supply, too, is to be considered. Most architects say a southern exposure is the best, but this depends on your location.

here is complaining bitterly of lack of men. A movement is now on foot to import a large gang of Italian laborers. Most of the Hungarians, Poles, Roumanians, and other Europeans have been restless and hard to keep. The negro laborers are very independent and work when they feel like it. A large number of excellent men could be used here to advantage.

President Roosevelt has recommended to President Cabrera of Santo Domingo, the appointment of W. E. Pullman, of Kentucky, now deputy collector of customs at Manila, an administrator of customs in Santo Domingo to fill the vacancy caused by the resignation of Col. George Colton, who has been appointed collector of Manila.

the glories of the woods and fields in summer.

Both the Masonic Fraternity and the Odd Fellows have decided to erect buildings in the near future. Efforts are now being made to get both orders to come together and erect one handsome building for the use of both, each to have its own meeting hall and entrance, with the first floor as a tavern hall and open house.

Other building is proceeding in various parts of the town. The Virginia Slate Company, a large and heavily-backed company, has leased slate land from Edwards and Roberts, and is now working it vigorously.

The latest machinery has been installed, limes built, and many buildings erected. They are already producing slate of the highest grade, and in satisfactory quantities.

The other companies here are all doing well. The only handicap is lack of labor. Every quarrying company
